PROFILE

Final-year B.E. Computer Engineering student (May 2026) with hands-on experience in Machine Learning, Deep Learning, NLP, and Generative AI. Skilled in Python, TensorFlow, PyTorch, Scikit-learn, LangChain, FastAPI, and data preprocessing, with experience building production-ready RAG systems, LLM security tools, and deployment pipelines.

WORK EXPERIENCE

AI Security Intern

Dec 2025 – Feb 2026

Audix Technology

Mumbai, India

- Developed GuardianAI, a full-stack AI security platform using React.js and FastAPI to protect Large Language Models (LLMs) and AI Agents against 4 adversarial attack vectors – prompt injection, jailbreaking, PII leakage, and RAG poisoning – reducing threat detection latency by ~40% through real-time request interception pipelines.
- Built monitoring and validation logic for secure LLM workflows, improving model safety, response filtering, and automated detection of sensitive data leakage.

Data Analyst Intern

June 2025 – July 2025

Cognifyz Technologies

Remote

- Performed EDA and data preprocessing across a 9-task pipeline on restaurant datasets using Python (Pandas, NumPy, Matplotlib), including cuisine frequency analysis, geospatial clustering, rating distribution, NLP-based sentiment analysis, and price-range correlation.
- Prepared charts, reports, and structured insights to support data-driven decision-making and downstream analysis.

PROJECTS

JobSphere AI – AI-Powered Career Platform | *Next.js, Node.js, Prisma, Gemini AI*

2026

- Developed a full-stack career platform featuring an AI Resume Optimizer that analyzes PDFs to generate ATS scores, keyword gap analyses, and STAR-method enhancements using Gemini 1.5 Flash.
- Built an interactive mock interview module (Saarthi AI) with LLM-based dynamic questioning and ElevenLabs voice synthesis, while architecting a scalable Node.js/Prisma backend to fetch job listings from 7 APIs and power a responsive Next.js 15 dashboard.

Customer Support RAG Bot | *LangChain, ChromaDB, FastAPI, HuggingFace Embeddings, MLflow, Docker*

2026

- Built a production-grade RAG chatbot with a semantic search layer using HuggingFace embeddings and ChromaDB for contextually relevant document retrieval, backed by a LangChain orchestration pipeline; handled end-to-end model deployment via Docker + FastAPI with a CI/CD pipeline via GitHub Actions for automated testing and deployment.
- Integrated RAGAS and MLflow for answer quality benchmarking, experiment tracking, and real-time performance monitoring; exposed a web dashboard for live chatbot observability.

ShieldAI – Secure Code Reviewer | *Llama 3, Ollama, Python, Streamlit*

2025

- Built a privacy-first SAST tool using local Llama 3 via Ollama to detect OWASP Top 10 vulnerabilities in code with zero code exfiltration.
- Implemented an auto-remediation engine and a “Chat with Code” AI tutor with JSON-enforced structured output for consistent security reports.

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript, Solidity

AI/ML Frameworks: TensorFlow, PyTorch, Scikit-learn, Hugging Face Transformers, PEFT/LoRA, YOLOv8, OCR, MCP protocol

LLM & GenAI: LangChain, LangGraph, Llama 3, RAG, Prompt Engineering, Fine tuning

Web & Backend: React.js, Next.js, Node.js, FastAPI, Flask, REST APIs

Data & Vector DBs: Pandas, NumPy, MongoDB, Pinecone, FAISS, ChromaDB, PostgreSQL

Cloud & DevOps: AWS, Docker, Git/GitHub, Streamlit, Google Colab, Kubernetes

Concepts: Data Structures and Algorithms (DSA), OOPs, DBMS, Cryptography

EDUCATION

B.E. Computer Engineering	Nov 2022 – May 2026
<i>TPCT's Terna Engineering College, University of Mumbai</i>	<i>CGPA: 9.11/10.0</i>
Class XII (AISSCE)	2022
<i>Central Board of Secondary Education</i>	<i>Percentage: 91.20%</i>
Class X (AISCE)	2020
<i>Central Board of Secondary Education</i>	<i>Percentage: 95.80%</i>

CERTIFICATIONS

AI Strategy & Business Intelligence Internship <i>IBM SkillsBuild / CSRBOX / AICTE</i>	April 2026
AI Mastery Bootcamp <i>Udemy</i>	2026
Snowflake Cloud Data <i>Alison</i>	2026
Python <i>freeCodeCamp</i>	2025

ACHIEVEMENTS

Research Publication	2025
• Paper on Privacy-Preserving Decentralized Finance using Zero-Knowledge Machine Learning accepted at Blockchain Kaigi (BCK) 2025. • Research focuses on verifiable inference for DeFi credit scoring models without revealing model weights.	
Book Chapter Contribution	2025
• Abstract accepted for CRC Press book “Mathematical Advances of AI in Healthcare”.
